The following is an examiner's statement of reasons for allowance: New prior art, GB 2095558, teaches a film comprising a water-soluble polymer such as polyvinyl alcohol or methyl cellulose and a chemical such as insecticide or fertilizer at page 1, lines 34-57 and in examples. However, GB teaches the use of water-soluble and miscible solvent such as glycerin, and fails to teach or fairly suggests the use of the instant charged or ring-opened polymers.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
